

Don't Gamble with Our Future...

*...Casino San Pablo – Gambling with the Community's
Emergency Room*

- The only public emergency room in West Contra Costa County is immediately adjacent to the proposed site – no mitigation is specified in the Compact.
- The Compact does not require the Tribe to negotiate with the hospital.

The Casino is immediately adjacent to the only public emergency room in a radius of approximately 20 miles. A letter sent by the West Contra Costa Healthcare District who owns and operates Doctors Medical Center (Hospital) stated:

“The District is very concerned about access to the Hospital. The increase in traffic generated by a new casino likely will create gridlock on both Interstate 80 and local streets. This may cause substantial delays for ambulances and others trying to reach the Hospital in an emergency...” ***Letter from Archer Norris on behalf of West Contra Costa Healthcare District to the National Indian Gaming Commission – September 24, 2004.***
